Mission Statement:

The ASE Foundation provides support for education, research, quality improvement and professionalism for ASE members and the larger community of health care providers, and patients for whom cardiovascular ultrasound is essential.

As a 501 (c) (3) non-profit organization, contributions made to the ASE Foundation are tax deductible to the fullest extent of the law.

2013 Reflection

The Giving Tradition Spreads

By Tom Ryan, MD, FASE
Foundation Annual Appeal Chair

As I reflect on the close of our 2013 Annual Appeal campaign, I am struck with pride at the association's achievement in creating a lasting movement of members that are now seeing giving to the Foundation as an annual tradition. Over 80% of the donors that pledged in 2012 renewed their commitments in 2013. And, the number of individual givers has continued to expand each year, with over 2,200 of our members giving (see the impressive list at the back of this issue) generously to support our efforts in this campaign. In addition, our number of "sustainers" (donors who pledge to give an automatic amount on a monthly basis) has continued to expand, which reflects the growing feeling that the Foundation is going to continue to build. I think this is a reflection on the fact that we have been able to prove to our donors that when they give, it all goes to the worthwhile outreach projects and mission-based activities they support.

I want to thank my fellow taskforce campaign volunteers including Mike Foster, Brian Hoit, Peg Knoll, Steve Lester, Vera Rigolin, Maryellen Orsinelli, David Adams, Miguel Quinones, Marti McCulloch, Bharatbhusan Patel, Jose Banchs, Navin Nanda, Ben Eidem, Jim Thomas, Vijay Nambi, and John Toptine who actively reached out to all of our FASE members and many others to encourage their giving as they have personally done for this important campaign. They also provided guidance on the projects that were selected for funding, and in one such decision, the Society will be funding its first ever domestic humanitarian mission in the Fall of 2014 in Los Angeles, CA.

We reached for new funding targets in 2013 by applying for our first grant and promoting the Foundation in the *One Heart Magazine*. And, we continued projects that have brought us success in the past, such as the Gala, the Fun Run and the Local Society and Hospital Competition. We worked hard to make sure every dollar that was given in 2012 was allocated to move the field and its vision forward. And we celebrated our amazing contributors at the second annual donor reception in June, honoring those who generously gave to last year's Appeal.

Now, we are extremely excited to announce that the 2013 Annual Appeal was successful in raising more than 76% of its goal through donations, and with the gains from wise investments, will surpass our \$250,000 funding goal for this campaign! We are thrilled to have secured enough funding to support the organization's 2014 giving targets. Without your generous donations, we would not have been able to reach this goal and we thank you!

Through the support of the ASEF donations, in 2014 ASE will provide at minimum:

- \$100,000 in research grants
- \$42,295 in student scholarships and grants
- \$25,000 in philanthropic mission support
- \$10,000 in guideline-related standardization activities

The ASE Foundation committee is now vetting other proposals, including a Forum showcasing the Value of Echo and another global humanitarian outreach for the remainder of the 2013 annual appeal funds.

We look forward to continuing the Foundation's work in 2014. We have already launched the 2014 Appeal and remain confident that together we can continue to build on what is working and reach for increasing impact in the year to come. If you have projects or ideas that you think the Foundation should undertake, please feel free to drop me a line.

2nd Annual Local Society & Hospital Competition Review

After a successful inaugural year of the Local Society & Hospital Competition in 2012, the ASE Foundation decided to bring the Competition back for another year and “up the game” for participants by adding new prizes to sweeten the pot.

Once again, we were encouraged by the level of participation we saw in the Competition! The following groups and their individual contributors raised \$15,110 for the ASE Foundation’s 2014 initiatives.

- Duke University Health System - *Overall highest contributing group*
- Ohio State’s Ross Heart Hospital
- Greater Houston Society of Echocardiography
- Orange County Echo Society

- Cleveland Clinic
- University of Chicago Medical Center
- Providence Hospital
- Mayo Clinic Echo Labs
- Greater Baltimore Echo Society
- New York Echo Society
- Utah Echo Society
- Atlanta Regional Society of Echocardiography

Did you or your group participate in the Local Society & Hospital Competition this year? In what ways can we improve the Competition and incentivize groups to participate? We would love to hear your feedback at foundation@asecho.org. ■

ASE Foundation's
5th Annual Research Awards Gala
Saturday, June 21, 2014
The Nines | Portland, Oregon

In celebration of the 25th Anniversary of ASE's Scientific Sessions, the gala will feature a silver masquerade theme.

Want to join the fun and support echo research? Individual tickets and tables available online at asefoundation.org/gala. For additional questions regarding the event, contact gala@asecho.org.

Advancing Patient Care Around the World – One Translation at a Time

One of the ASE Foundation's primary goals is to support the standardization of quality patient care globally. Worldwide patient care is varied, and as explained by Thomas Ryan, MD, FASE, Chair of the ASE Foundation, efforts to enhance care across borders are important. "Echocardiography, due to its portability, safety and its value in the diagnosis of most heart and circulation conditions, is already used throughout the world. This necessitates a global voice for cardiac ultrasound to speak the same language everywhere."

ASE Foundation is working to be that voice. Since the Foundation's inception, 21 guideline documents and posters have been translated by international volunteers into 4 languages, and then disseminated free of charge worldwide. *In 2013 we began translating guidelines into Portuguese and French, expanding our reach into much of Africa as well as Brazil.*

Translations of full-text guidelines are currently available in Mandarin, Spanish, Portuguese, and French.

ASE Foundation translations are now expanding to guideline-based posters for the echo lab. After working with the Departamento Imagem Cardiovascular (DIC), the Brazilian echo society, to translate ASE's guidelines into Portuguese, we partnered to create two translated posters as well. The Brazilian society provided the translation, ASE Foundation provided financial support for the artwork, and GE Latin America provided support for printing and distributing these posters within Brazil. *In turn, the DIC is providing a generous donation back to the ASE Foundation in 2014 to support continued guideline dissemination globally.*

This Portuguese project generated similar interest from the Echo Society of the InterAmerican Cardiology Society

(ECOSIAC). Working with ECOSIAC for translation assistance, ASE Foundation provided financial support for revisions to the poster artwork. This translated poster is expected to be made available to ECOSIAC members in early 2014.

With the help of our generous donors and international partners, ASE Foundation plans to expand its educational outreach with new translations in 2014. For more information on our translated guidelines, visit www.asecho.org/translations. Interested in supporting the ASE Foundation's work in this area? Visit www.asefoundation.org/donate. ■

If you've already registered, or need additional tickets, visit asescientificsessions.org/taste. Price includes two drink tickets.
Additional beverages available at a reduced rate.

SATISFACTION 100% GUARANTEED

Making an Impact at Home and Abroad – A 2014 Humanitarian Missions Preview

The ASE Foundation Task Force will participate in a large, Los Angeles-based healthcare clinic this fall. After the great success of our international missions, we felt it was important to consider supporting missions closer to home as well. Our call for applications for U.S.-based missions produced some great options, thank you! ASE Foundation hopes to provide a substantial number of cardiovascular ultrasound screenings to uninsured and at-risk individuals at the clinic.

Looking ahead on the international front, proposals are also under consideration for international missions in Africa, Vietnam, and South America in late 2014 and 2015. Similar to the missions ASE Foundation supported in India, these events will simultaneously serve to educate and train local physicians while providing direct services to those in need. ■

2014 ANNUAL APPEAL
Making a  WORLD of Difference

SPECIAL PROMOTION

Foundation Partnership:

DIGISONICS

Mastering the art of interpretation

For over 35 years, Digisonics has provided top-rated clinical image management and structured reporting systems in the fields of cardiology, radiology, and obstetrics & gynecology - and the industry's best customer service. The Digisonics system has been recognized as the number one cardiovascular imaging and information system* for the past five consecutive years, an unprecedented feat.

Digisonics focuses on combining the latest technology with recognized medical standards and requirements. One example is how Digisonics solutions can be used to meet Appropriate Use Criteria. Appropriate Use Criteria (AUC) are evidence-based guidelines to assist referring physicians and other providers in making the appropriate imaging or treatment decision for a specific clinical condition/indication. Both reimbursement and Medicare audits will be tied to appropriate use scores in the future, so there is considerable benefit from software facilities that monitor appropriate use scores and produce the required reports.

The Digisonics Appropriate Use Criteria (AUC) feature provides the following:

1. Provide a configurable Appropriate Use table that includes columns for study type/procedure, indications and appropriate use scores.
2. When an order is received an Appropriate Use score will be calculated based on this table. If this score is in the range of uncertain appropriateness (score 4-6) or inappropriate (score 1-3), a warning will be sent to a configurable path, suggesting that specific clinical justification is required for the procedure.
3. When the final report is signed, the Appropriate Use score and clinical justification fields will again be checked and another warning will be displayed if necessary.
4. The Appropriate Use score, clinical justification for the study, and dates message was sent will be databased.
5. Management reports will summarize Appropriate Use scores by procedure and referring physician so that this new requirement can be proactively managed:

A = appropriate for scores of 7-9

U = uncertain for scores of 4-6

I = inappropriate for scores of 1-3

Digisonics takes pride in its legacy of innovation and the quality of its image management and structured reporting solutions. Exceptional products together with disciplined growth have led to unparalleled technology continuity. Sites have used Digisonics applications and technology for over 35 years, always building on the latest technology, while preserving the value of their patient data. Digisonics solutions help facilities increase clinical efficiency, cut costs and improve the quality of patient care.

* Digisonics DigiView, 2008, 2009, 2010, 2011 & 2012 Top 20 Best in KLAS Awards: Software & Professional Services, www.KLASresearch.com

Give. Improve the world. Repeat.

Did you know that as an ASE Foundation Sustainer, you can give on a monthly (even weekly) basis? This continual giving provides consistent, reliable funding allowing ASEF to focus more resources on game-changing initiatives. Sustained giving equals sustained impact. Be a Sustainer.

Make your one-time or sustained donation today at asefoundation.org.
