

ASE Global: Focus on India – December 2012 Readers

Sixty-one Level II trained physicians read 1,096 focused echocardiograms online from locations worldwide, ranging from major U.S. and Canadian hospitals to overseas facilities located in Bulgaria, Colombia, Egypt, Georgia, Greece and Italy. Using Core Sound Imaging's Studycast, the physicians were able to view their assigned studies online and then complete an abbreviated findings report for each patient. The reports were then rerouted back to India for review by the local physicians for follow-up care decisions.

Maysoon Alsandook, MD, Los Angeles, CA
Federico Asch, MD, FASE, Washington Hospital Center/ Medstar Research Institute, Washington, DC
Jose Banchs, MD, FASE, University of Texas - MDACC, Houston, TX
Nicole Bhawe, MD, University of Chicago Medical Center, Chicago, IL
